

Contents

Access 2003 Orientation

1. Starting Access 2003
2. Opening An Existing Database
3. The Access 2003 Screen
4. The Database Window
5. Working With Database Objects
6. Using Menu Commands
7. Using Keyboard Shortcuts
8. Exiting From Access 2003

Database Theory

1. Understanding Databases
2. How Access Stores Data
3. Spreadsheets Versus Databases

Database Design

1. Designing A Relational Database
2. Scoping The System
3. Determining The Inputs
4. Normalising A Table
5. First Normal Form
6. Second Normal Form
7. Second Normal Form - Case Study
8. Third Normal Form

Creating Relational Databases

1. Creating A New Database File
2. Access 2003 Data Types
3. Creating A New Table
4. Changing Field Properties
5. Creating A Table From A Shortcut
6. Creating A Table With Numbers And Currency
7. Assignment - Creating Tables

Setting Table Relationships

1. Understanding Table Relationships
2. Accessing The Relationships Window
3. Table Joins In The Case Study
4. Creating Table Joins
5. Assignment - Creating Relational Joins
6. Editing An Existing Relationship
7. Printing Table Relationships

Adding Relational Records

1. Adding Records In A Table
2. Adding Records Using An AutoForm
3. Assignment - Adding Records
4. Data Entry Key Violations
5. Data Integrity Violations

Importing Records

1. Importing From A Spreadsheet
2. Importing From A Text File
3. Backing Up A Table
4. Importing And Key Violations

5. Deleting An Unwanted Table
6. Data Integrity And Importing

Working With Records

1. Navigating In A Table
2. Editing A Record
3. Deleting A Record
4. Deleting Several Records
5. Finding And Replacing
6. Undoing An Error
7. Compacting A Database
8. Printing Records
9. Assigning A Sub Datasheet
10. Working With Sub Datasheets

Data Validation

1. Assigning Default Values
2. Marking A Required Field
3. Validation Rules And Text
4. Creating A Lookup Field
5. Working With Validations

Relational Queries

1. Relational Queries - How They Work
2. Queries For Viewing Data
3. Creating A Query Design
4. Selecting Fields For The Query Grid
5. Different Views Of A Query
6. Adding More Tables To A Query
7. Modifying Fields In A Query
8. Selecting Records Using A Query
9. Running A Query From The Database Window

Relational Select Queries

1. Creating AND Queries
2. Clearing The Criteria From A Query
3. Selecting Numeric Data
4. Selecting Dates In A Query
5. Creating OR Queries
6. Using A Range Expression
7. Selecting Opposite Values
8. Using Wildcards
9. Problem Selects

Calculated Fields

1. Creating A Calculated Field
2. Formatting Calculations
3. Calculating Across Two Tables
4. Calculating Dates
5. Using Criteria In Calculations
6. Concatenating String Fields

Parameter Queries

1. Creating A Parameter Query
2. Displaying All Records
3. Using Parameters To Display A Record Range
4. Nominating Specific Data Types
5. Using Parameters In Expressions

Creating Forms

1. Forms - How They Work
2. Creating A Single Table Form
3. Working With A Form
4. Creating A SubForm
5. Creating A Linked Form

Creating Reports

1. Reports - How They Work
2. Creating A Single Table Report
3. Previewing A Report
4. Creating A Multi-Table Report
5. Creating A Report From A Query

Using The Switchboard

1. Creating A Switchboard
2. Creating Subsidiary Menus
3. Creating A Menu Item
4. Returning To Another Menu
5. Creating A Number Of Menu Items
6. Linking The Menus
7. Modifying The Menu Forms
8. Changing The Startup

General Computer Usage

1. The Help Task Pane
2. Searching For General Help
3. Searching For Specific Help
4. Understanding A Help Window
5. Disabling Online Content
6. Enabling Online Content
7. Using What's This & Screen Tips
